### ***Section III. Influenza Vaccine Information***

Inactivated (recombinant) quadrivalent influenza vaccine: this vaccine protects against four different influenza virus subtypes: two influenza A strains (one each of H<sub>1</sub>N<sub>1</sub> and H<sub>3</sub>N<sub>2</sub>), and two influenza B strains. Because it is created from dead and inactivated viral components, this vaccine *will not* and *can not* give you the flu. Our vaccines do not contain any preservatives. Administration is into the upper deltoid muscle of the arm. Side effects are generally mild, and may include soreness, redness, itching, or swelling at the injection site. Fever, hoarseness, red or itchy eyes, drowsiness, headache, and muscle aches are also possible, though rare. These symptoms usually begin soon after the injection and may last for one to two days.

Annual influenza vaccination is the most important way of preventing seasonal influenza virus infections and potentially severe complications. Vaccination reduces the likelihood of becoming ill with influenza, transmitting influenza to others, and protecting other individuals within our community: those who are not vaccinated, those with compromised or underdeveloped immune systems, those with chronic illnesses at higher risk of serious complications due to the flu, and those who have received the vaccine but did not develop immunity. Please refer to the Vaccine Information Statement (VIS) for additional information.

### ***Section IV. Signature***

I understand the benefits and risks of the vaccination as described in the Vaccine Information Statement (VIS), a copy of which was provided with this Consent and Release. I hereby consent to the administration of the influenza vaccine. I have read the information on this form. I release and hold harmless Riverside Remedies Pharmacy, its pharmacists, staff, employees, volunteers, and any other persons involved, from any liability, damage, or claim arising from any injury or complications that may result from my participation in this vaccine program. I understand that the vaccine will not be fully effective for approximately two weeks, and as with all vaccines, there is no guarantee that I will become immune or will not experience side effects.

I have received a copy of the Privacy Practices and appropriate CDC Vaccine Information Statement (VIS). I understand the notice of Privacy Practices provides an explanation of the ways in which my health information may be used or disclosed by the Pharmacy and my rights with respect to my health information. I have been provided with the opportunity to discuss concerns I may have regarding the privacy of my information.
